Notes:

Cell shading:

White: Data provision is required.

Light blue: provision of data is voluntary.

Light orange: Footnotes (only to be filled-in when relevant)

Black: Reporting is not applicable.

⁽¹⁾ The amount of generated waste per material may be based on data on separately collected waste and on estimates derived from regularly updated waste composition surveys of municipal waste. Where no such surveys are available, the category of mixed waste may be used. The concept of municipal waste generated is the same as in Table 1 - JQ Format. The LoW codes relate to the generated quantities only, other codes e.g. chapter 19 10 / 19 12 would relate to waste treatment.

⁽²⁾ This includes incineration with energy recovery and the reprocessing of waste to be used as fuels or other means to generate energy. The weight of waste subject to energy recovery per material may be based on estimates derived from regularly updated waste composition surveys of municipal waste. Where no such surveys are available, the category of mixed waste may be used.

⁽³⁾ This excludes preparing for reuse, recycling and energy recovery, and includes backfilling.

⁽⁴⁾ Metals separated after incineration of municipal waste shall be reported separately and shall not be included in the row for metals and in the total amount of waste entering energy recovery operations.

⁽⁵⁾ Bio-waste separated and recycled at source shall be reported separately and shall not be included in the row for bio-waste.

⁽⁶⁾ This includes large dimension waste items which require specific collection and treatment such as furniture and mattresses.

Note: as you move through the waste process (e.g. from waste generation to recycling) there will be no bulky waste (e.g. under recycling) as this will be broken down by then.

⁽⁷⁾ 20 01 13*, 20 01 14*, 20 01 15*, 20 01 17*, 20 01 19*, 20 01 21*, 20 01 23*, 20 01 26*, 20 01 27*, 20 01 28, 20 01 29*, 20 01 30, 20 01 31*, 20 01 32, 20 01 41, 20 01 99, 20 02 03, 20 03 02, 20 03 03,

⁽⁸⁾ Proportion of municipal waste generated that is collected separately - this does not equal the sum total of the subsequent columns.

Table 4 - Landfill rate - for measuring compliance with the policy target in accordance with Article 5(5) of Council Directive 1999/31/EC concerning the landfilling of waste according to the format set out in Annex II of Commission Implementing Decision 2019/1885 for the calculation of the landfill rate

We do not have data on metals separated after incineration of municipal waste in foreign incinerators / energy recovery plants.

Notes:

⁽¹⁾ The concept of municipal waste generated is the same as in Table 1-municipal waste statistics (joint questionnaire (JQ), Table 2 - Material breakdown and - in case method 4 is chosen - as well in Table 3 - Recycling rate (questionnaire MWRO).

⁽²⁾ This column does not include waste entering incineration disposal operations and subsequently recovered from incineration disposal operations.

⁽³⁾ Incineration disposal refers to operations carried out by facilities classified as D10 in Annex I to Directive 2008/98/EC of the European Parliament and of the Council of 19 November 2008 on waste and repealing certain Directives (OJ L 312, 22.11.2008, p. 3).
